

GoldCare CHA

Web-Based Point-of-Care Assessment Completion and Detailed Reporting in One Package

“

GoldCare was the clear choice. It was strong on every one of our requirements, and in many cases, exceeded our expectations for the RAI-CHA, where their installation results in the CSS sector were miles ahead of other vendors.

”

~ Lori Cooper
Executive Director
Community Support, VON Canada

GoldCare offers a comprehensive and easy-to-use instrument to electronically complete and submit the interRAI Community Health Assessment (CHA).

Regardless of which client management system you use, GoldCare provides an industry leading and proven solution to track and complete the interRAI Community Health Assessment. Combined with powerful, integrated business intelligence, user-friendly interfaces and integration to the industry's client-management solutions, GoldCare has become the most widely used CHA technology solution on the market today.

Standardized Assessment in an Easy-to-Use Format

- ▶ **Certified RAI Tool:** Developed in partnership with interRAI and the University of Waterloo, GoldCare's CHA, like all RAI assessments completed in GoldCare, complies with interRAI standards.
- ▶ **Quick and Consistent Data Entry:** Increase data accuracy and inter-rater reliability. GoldCare's automated step-by-step approach allows you to complete the interRAI-CHA using drop-down menus and radio buttons.
- ▶ **Convenient Data Collection:** Improve speed and consistency when completing, updating and submitting the interRAI-CHA and other assessments with GoldCare. The intuitive interface provides easy, one-click access to assessment sections—you can even complete sections in the order you choose.

- ▶ **Immediate Outcome Scores:** Save time and reduce calculation errors. GoldCare automatically calculates an outcome score once an assessment has been completed, providing you with valuable information to further develop a client's care plan and track care trends.
- ▶ **Intelligent Assessment Protocols:** Improve care planning and client progress monitoring; increase quality of care and risk management. GoldCare calculates Client Assessment Protocols (CAPs), providing you with comprehensive documentation and graphical analysis of CAPs.

Save Time, Enhance Care Planning and Decision-Making, Improve Point-of-Care Efficiency

- ▶ **Automated Care Plans:** GoldCare's integrated Care Plan Builder saves you time by suggesting care plans based on data captured from the completed assessment. Care plans are automatically created whenever an assessment protocol is triggered.
- ▶ **Comprehensive Reporting:** GoldCare provides comprehensive reporting and statistics on triggered Assessment Protocols, Outcomes, MAPLe scores, top diagnoses and more. Data from the assessment can be pulled into GoldCare Insight to generate sophisticated reports for data analysis and measurement to support risk management and program planning.
- ▶ **Point-of-Care:** GoldCare offers two mobile options for remotely completing the interRAI-Community Health Assessment at the point-of-care.
 - » Ideal for areas with limited to no connectivity, our award-winning **Care Anywhere** solution allows the use of a laptop or tablet to enter information and conduct assessments while disconnected from the GoldCare server. Data is synchronized with the GoldCare server when a connection is established.
 - » A web-based solution, use Internet Explorer on a laptop or tablet with a secure wireless card to remotely complete assessments, update, and view client information while ensuring data security and confidentiality.
